Product Description

PRESSURE SWITCHES

Duke's Pressure switches are another quality products from the house of Duke. It is included in the piping line to regulate the pressure of the pipeline. It automatically power-ON the pump if the pressure dropped below than the pre-fixed "cut-in" pressure and turns off the pump if the pre-set pressure attained. These high quality switches provides the high accuracy & very quiet operation. Both Horizontal & Vertical models availbleand Some models are with adjustable pressure settings.

FLOAT SWITCHES

Duke's Pressure switches are another quality products from the house of Duke. It is included in the piping line to regulate the pressure of the pipeline. It automatically power-ON the pump if the pressure dropped below than the pre-fixed "cut-in" pressure and turns off the pump if the pre-set pressure attained. These high quality switches provides the high accuracy & very quiet operation. Both Horizontal & Vertical models availbleand Some models are with adjustable pressure settings.

Technical Specification

	Pressure Switch	Float Switch
Rated Voltage	220/230/240	220/230/240
Phase	1 Phase	1 Phase
Frequency	50Hz/60Hz	50Hz/60Hz
Max. working Pressure	10 bar	-
Starting Pressure	1.5 bar	-
Max. Current	10A	10A
Max. power	1.5kW	-
Protection	IP65	IP67
Max. working Temperature	60 Deg C	60 Deg C

Features

- | Optimal design
- | Compact construction
- | Very Quiet Operation
- | Precisely made parts
- | Handy
- | Hygiene
- | Built-in Reset Button
